This binary code license ("License") contains rights and restrictions associated with use of the accompanying software and documentation ("Software"). Read the License carefully before installing the Software. By installing the Software you agree to the terms and conditions of this License.

**1. Limited License Grant.**

Adiscon grants you a non-exclusive License to use the software free of charge for 30 days for the purpose of evaluating whether to purchase a commercial license of MonitorWare Agent. After this period, users are required to purchase proper licenses if you continue to use it. If Customer has purchased MonitorWare Agent licenses, Customer is permitted to use the purchased product edition under the terms of this license agreement.

**2. Copyright**

**3. Trademarks and logos**

MonitorWare is a trademark of Adiscon. Windows is a registered trademark of Microsoft Corporation. All other trademarks and service marks are the property of their respective owners.

**4. Licensed syslog and SNMP Clients**

A MonitorWare Agent license covers the installation of one system. MonitorWare Agent comes in several editions, each of them permitting the reception of data from a different number of devices. You must purchase the edition of MonitorWare Agent that reflects the number of different devices sending messages to the installed MonitorWare Agent server. The MonitorWare Agent Workstation Basic Edition permits you to receive messages from up to 10 devices. The MonitorWare Agent Server Basic Edition permits you to receive messages from up to 50 devices. The MonitorWare Agent Workstation or Server Professional Edition permits you to receive messages from up to 100 devices. The MonitorWare Agent Workstation or Server Enterprise Edition permits you to receive messages from an unlimited number of devices. Please note that instances of Adiscon's EventReporter and/or MonitorWare Agent do NOT count against the remote device count. So you may use a MonitorWare Agent Server Professional edition to receive data from 500 servers with Adiscon EventReporter installed on them.

**5. Licensed remote file monitor Clients**

MonitorWare Agent can be used to monitor text files on remote systems. This remote monitoring requires a proper license. MonitorWare Agent comes in several editions, each of them permitting remote file monitoring for a different number of remote systems, You must purchase the edition of MonitorWare Agent that reflects the number of different remote systems being monitored by MonitorWare Agent. The MonitorWare Agent Workstation or Server Basic Edition does **not** permit you to monitor files on remote systems. The MonitorWare Agent Workstation or Server Professional Edition permits you to monitor files on up to 10 remote systems. The MonitorWare Agent Workstation or Server Enterprise Edition permits you to monitor files on an unlimited number of remote systems.

Please note that only the number of remote systems counts toward the license. So if you monitor 50 files on a single remote system, this counts as a single license. If you monitor a single file on each one of 50 remote systems, than this counts as 50 licenses.

**6. Licensed remote event log monitor clients**

MonitorWare Agent can be used to monitor Windows event logs on remote computers. A full MonitorWare

Agent license is required for each remote computer on which Windows event logs are being monitored. Technically, the product might count licenses based on the number of remote event log monitors configured. In such cases, a license is required for each remote event log monitor configured.

### **7. Product Editions**

A specific edition of the MonitorWare Agent product is licensed. Only the specifically licensed version may be used. For example, if an MonitorWare Agent Workstation Basic Edition is licensed, features of the Professional edition may not be used. The license keys are also technically different, that is a Basic edition license key is technically different from a Professional Edition license key. Thus, a Basic edition license key can not be used to unlock Professional features.

### **8. Evaluation period**

The product comes with a free 30 day evaluation period. We strongly encourage all customers to evaluate the products fitness for their systems and environment during the evaluation period. Customer agrees to install the product on production systems only after it has proven to be acceptable on similar test systems.

### **9. Redistribution**

Everybody is granted permission to redistribute the install set if the following criteria are met:

- the install set, product and all documentation (including this license) are supplied unaltered
- there is no registration key distributed along with the install set. REGISTRATION KEYS ARE SOLE INTENDED FOR THE ORIGINAL CUSTOMER. IT IS COPYRIGHT FRAUD TO DISTRIBUTE REGISTRATIONS KEYS.
- the redistributor is only allowed to charge a nominal fee if the product is included into a commercial distribution set (e.g. shareware CD collection). For a CD collection, we deem a fee of up to US\$ 30 to be reasonable.
- redistribution as part of a book companion CD is OK, as long as the books purpose is not only to cover a CD software collection in which case we deem a cost of US\$ 50 for the book to be OK.
